

PSD2Outbound GCO Alert - Crypto / Cofi_Service_4XX_server_error

crypto-service_4XX_server_error

Why do we have this alert?

- Third party bank calls are going via crypto, If there is any issues with Crypto which will affect CoFi request.

What does this alert mean?

- This is to alert us, if any CoFi request are failing due to crypto service error.

Impact to customer

- Customer may not be able to proceed with credit request from the third party bank

Investigation Steps

- Get the Audit id/session id from the alert.
- Check the crypto service log using the id.
- We will be able to find more details from the response body & credit application id affected can also be available there.
- If we got the credit application id search with the same in cofi logs.

Query

```
SELECT
*
FROM
  xs2a_accounts_db.audit_log
WHERE
  audit_id = 'xxx'
ORDER BY
  created_date_time;
```

Verification Steps -

Verification can be done in database by running below query with the specific required timestamp and checking failure count doesn't exists anymore

```
SELECT * FROM xs2a_accounts_db.audit_log WHERE audit_id = 'xxx'
ORDER BY
  created_date_time;
```

*We can reach out to pegateq team for error request associated with particular bank to clear the reoccurring error.
