

PSD2Outbound GCO Alert-Xs2a_Low/Absent_Traffic_Stip

Xs2a_Low/Absent_Traffic_Stip

Why do we have this alert?

- This alert will not notify us if there is no traffic or if the traffic is less than five for one hour.
- Currently, the alert is applicable only during German business hours; outside of these hours, low to no traffic is anticipated.

What does this alert mean?

- The issue may be related to the front-end being inaccessible to the user or a connectivity problem in between.

Impact to customer

- Customer may not be able proceed with credit request/credit card request.
Note : it could be for any bank, there are multiple of bank added in the list.

Investigation Steps

- Please access the GCO Dashboard to verify whether we are receiving traffic, and this can also be confirmed through the database.

Dashboard: [Miles and More health check Dashboard – Monitoring – db-prd-mp-psd2ce-obd – Google Cloud console](#)

- Connect to Cloudsql database and run below query. Please edit the created_date_time according to the issue duration in the query.

Query

```
select count(*), to_char(created_date_time, 'dd-mm-yyyy hh24') from xs2a_accounts_db.audit_log al
where event_type IN('AS_GET_CONSENT_STATUS_RES','AS_GET_ACCOUNTS_RES')
and Date(created_date_time) >= '2025-11-10'
group by to_char(created_date_time, 'dd-mm-yyyy hh24');
```

- **If the alert is received between 12:00 AM CET to 06:00 AM CET , we can ignore this alert and no action is needed. Due to limitations in Active time for this alert, we cannot avoid this alert during off business hours.**
- Other than Above window , if we identify any sudden drop in traffic , please inform MnM core team.

Verification Steps:

- Please verify the dashboard to confirm that we are receiving traffic, and also check the database.
- Dashboard: [Miles and More health check Dashboard – Monitoring – db-prd-mp-psd2ce-obd – Google Cloud console](#)
- Connect to Cloudsql database and run below query. Please edit the created_date_time according to the issue duration in the query.

Query

```
select count(*), to_char(created_date_time, 'dd-mm-yyyy hh24') from xs2a_accounts_db.audit_log al
where event_type IN('AS_GET_CONSENT_STATUS_RES','AS_GET_ACCOUNTS_RES')
and Date(created_date_time) >= '2025-11-10'
group by to_char(created_date_time, 'dd-mm-yyyy hh24');
```

- Complete verification of this cannot be performed in case we do not have any traffic. It depends on downstream/upstream response to conclude if the issue is resolved or not.
