

PSD2Outbound GCO Alert - Cofi Voeb Exception Authentication Failures

PSD2Outbound GCO Alert - Cofi Voeb Exception Authentication Failures

Why do we have this alert?

- This alert will trigger when there is authentication failures with exception from VOEB.

What does this alert mean?

- This means request are failing while authentication with exception from VOEB.

Impact to customer

- Customer will not be able to create the consent due to authentication failures.

Investigation Steps

- We may see requests are failing with below error.

```
500 Server Error: {"rc":"1504","event_id":"36d7ba00-c6b3-4443-b64b-845ae9648aea","message_details":{"code":"TRVX_008","description":"Unknown exception occurred from VOB ","severity":"ERROR"}}{"rc":"1504","event_id":"36d7ba00-c6b3-4443-b64b-845ae9648aea","message_details":{"code":"TRVX_008","description":"Unknown exception occurred from VOB ","severity":"ERROR"}}{"bank_id":"HELADEF18222","bic":"HELADEF1822","name":"Frankfurter Sparkasse 1822direkt"}{"message":{"code":"TRVX_008","description":"Unknown exception occurred from VOB ","severity":"ERROR"}}
```

- We can Start the analysis by picking up CAID (Credit Application ID) for failures analysis in database.
- Check in Error_info column from Audit_log table.
- Check for the events and call failures.
- login to XS2A_COFI_RO_2 via postgresSQL.
- run the query below to check failed requests.

SQL

```
select credit_application_id,event_type,code,description,additional_data,created_date_time
from VDB308_OWNER_XS2A_ACCOUNT.audit_log
where
CREATED_DATE_TIME BETWEEN TO_DATE('14-06-2024 00:00:00','dd-mm-yyyy hh24:mi:ss')
AND TO_DATE('14-06-2024 23:59:00','dd-mm-yyyy hh24:mi:ss') and URL like '%EVENT_ID%';
```

Remediation steps

As per the prefix identify which event has failed and contact the respective team (Contact the VOEB team if Call to VOEB endpoints fails- refer the contact details as per the link in additional information).

Verification steps

- Execute the below query and verify that no failures observed with similar error message.

SQL

```
select
count(*)
from VDB308_OWNER_XS2A_ACCOUNT.audit_log
where created_date_time >= '2025-11-10 13:00:00' and created_date_time <= '2025-11-10 14:30:00' --check
for the timing post issue duration
and additional_data like '%Unknown exception occurred from VOB%';
```
