

PSD2Outbound GCO Alert - Third_party_bank_call_format_error

Third_party_bank_call_alert_format_error

Why do we have this alert?

- This alert is to notify if there is any issue while fetching third party bank details.

What does this alert mean?

- The requests may fail while fetching third party bank details like Read account details/Read transaction list.

Impact to customer

- Customer may not be able to fetch the third party bank details and request may get fail
Note : it could be for any bank, there are multiple of bank added in the list.
- List of banks - [CoFi 15. List of Banks - PSD2 Central Engine - Confluence \(db.com\)](#)

Investigation Steps

- We can start the analysis by picking up CAID (Credit Application ID) for failures analysis in database.
- Check in Error_info column from Audit_log table.
- Check for the events and call failures.
- login to XS2A_COFI_RO_2 via cyberark-
- run the query below to check failed requests,

Query

```
select * from vdb308_owner_xs2a_account.audit_log where Credit_application_id="PBDECOFI 525-11-00000000 240527-165731 01302706-5";
```

- Check for the events and call failures. As per the prefix identify which event has failed and contact the respective team.(you can reach out to Vaishali(Xs2A) for further investigation.)
