

PSD2Outbound GCO Alert-sealhub_invalid_certificate_used

PSD2Outbound GCO Aler-sealhub_invalid_certificate_used

Why do we have this alert?

- This alert is to notify if the invalid sealhub certificate is being used.

What does this alert mean?

- This is to identify if any sealhub subscribers are using invalid certificates.

Impact to customer

- Customer will not be able to sign and request will not proceed further and will get failed.

Investigation Steps

- we need to check the certificate expiration date for the sealhub certificate,
- this can be checked through sealhub FE,
- URL-<https://myworkspace.pwcc.de.intranet.db.com/workspace/v0001/#!/app/sealhub-service/v0001/subscriber-onboarding>
- This url can also be used to map/unmap if any certificate needed.
- Please reach out to Rajesh - rajesh-mallikarjun.jinde@db.com for any certificate expiry related queries. As we are using multiple type of certificates and process of requesting the certificate might vary depending upon the certificate type.
- Post that we have to involve crypto team (crypto.servicedesk@db.com) for the renewal process.
- Here's are the list of documents that refers to the certificate renewals.
 - eIDAS certificate renewal
 - [QuoVadis CA and OpenBanking CA](#)
 - [How to Onboard certificate in Sealhub](#)

Additional Information

- Contact Details: [Contact List - PSD2 Central Engine - Confluence \(db.com\)](#)
