

PSD2Outbound GCO Alert - Crypto / Cofi_Service_5XX_server_error

crypto-service_5xx_server_error

Why do we have this alert?

- Third party bank calls are going via crypto, If there is any issues with Crypto which will affect COFI request.

What does this alert mean?

- This is to alert us, if any CoFi request are failing due to crypto service error.

Impact to customer

- Customer may not be able to proceed with credit request from the third party bank

Investigation Steps

- Get the Audit id/session id from the alert.
- Check the crypto service log using the id.
- We will be able to find more details from the response body & credit application id affected can also be available there.
- If we got the credit application id search with the same in cofi logs.

Query

```
SELECT
*
FROM
select * from sealhub_db.audit_log
WHERE
audit_id = 'xxx'
ORDER BY
created_date_time;

2:
select * from sealhub_db.audit_log
where code not in ('200','201')
and created_date_time >= '2025-11-14 07:00:00' and created_date_time <= '2025-11-14 08:30:00'; change
time and date accordingly
```

Verifications Steps:

- 1: Once alert is we recived ,check the request_id,CA_ID or audit_id and check request for MnM or Cofi requests In GCO alert.
