

PSD2Outbound GCO Alert - java_connect_timeout_exception

PSD2Outbound GCO Alert

PSD2Outbound GCO Alert - java_connect_timeout_exception

Why do we have this alert?

- To ensure the applications are running successfully without java_connect_timeout_exception.

What does this alert mean?

A [java.net.ConnectException](#): Connection timed out is an exception in Java that occurs when a connection attempt to a remote server fails because the server did not respond within the specified timeout period. This can happen due to various reasons, such as:

- Network issues: Problems with the network can prevent the connection from being established.
- Server unavailability: The server might be down or not reachable.
- Firewall settings: Firewalls might be blocking the connection.
- Incorrect server address or port: The specified server address or port might be incorrect.

Impact to customer

- Customer would receive 4xx/5xx error from the response .

Investigation Steps

1. Check network connectivity: Ensure that your network is functioning properly.
2. Verify server status: Make sure the server is up and running.
3. Review firewall settings: Ensure that firewalls are not blocking the connection.
4. Confirm server details: Double-check the server address and port.

Remediation steps

- Create a JIRA ticket with RTB team if the issue persist.
