

PSD2Outbound GCO Alert-Istio Internal Server Error

PSD2Outbound GCO Alert-Istio Internal Server Error

Why do we have this alert?

- To notify if the service mesh has encountered an internal server error.

What does this alert mean?

For early detect of Issues in Istio.

Impact to customer-

- It will affect the currently processing as well as incoming requests.

Investigation Steps-

- Click on the link provided in the email to access the logs in Google Console.
- Verify the alert timestamp, severity, and affected resources.
- Analyze the error messages available in the alert logs in GCP
- Collect additional logs by searching in DB with the affected ids.
- check with relevant team (crypto) for further investigation

Query

- ```
select * from xs2a_accounts_db.audit_log

where credit_application_id ='PBDECOFI 525-11-00000000 240923-215709 01224505-4'

order by created_date_time;
```

### Verification Step-

- Once alert is received, check the request\_id, CA\_ID, audit\_id and check MnM or Cofi requests failing in GCO alert.
- Then check at which event type giving error and for which bank its failing.
- Report this issue respective team, need to monitor closely whether issue resolved or not.
- For that we need to check in Database latest success request.
- check requests for that particular bank success or not.
