

PSD2Outbound GCO Alert-No traffic found for the top 10 banks in last 24 hrs

PSD2Outbound GCO Alert-MnM_no_http_response_exception

Why do we have this alert?

- This alert is to notify if there is any NoHttpResponseException error observed.

What does this alert mean?

- The client sent an HTTP request to a server, but the server closed the connection **before sending any response back**.
- This is to alert us, if issue while reaching out to [testmerch.directpos.de](#).

Impact to customer

- It will affect the currently processing as well as incoming requests.

Investigation Steps

- Click on the link provided in the email to access the logs in Google Console.
- Verify the alert timestamp, severity, and affected resources.
- Analyze the error messages available in the alert
- Collect additional logs by searching in DB with the affected ids.

Query

```
SELECT
*
FROM      xs2a_accounts_db.audit_log
WHERE
    audit_id = 'xxx' --get the ids from GCO log
ORDER BY
    created_date_time;
```
